

Kim Ridout, M.S., PMP®, REM®

Environmental Systems & Program Management Professional | Data & Decision Support

KimmyRidout@gmail.com | 858.833.1307 | [LinkedIn Profile](#) | [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Environmental systems and public-sector professional with 12+ years of experience leading and supporting complex sustainability, regulatory, watershed, and community-focused initiatives involving multi-source data, stakeholder coordination, technical reporting, and program management. Experienced in translating technical, operational, and community inputs into actionable plans, measurable outcomes, and executive-level decision support.

Currently completing the MIT xPRO Data Engineering Certificate with experience in Python, SQL, ETL workflows, APIs, database systems, and data modeling. Brings a systems-oriented approach to program management with strong emphasis on strategic prioritization, stakeholder engagement, accountability, and development of scalable data-informed solutions supporting environmental resilience and public-sector operations.

TECHNICAL & ANALYTICAL SKILLS

Data & Engineering: Python, SQL, ETL/ELT workflows, data modeling, REST APIs, database design, data quality and validation, workflow automation

Databases & Platforms: MySQL, MongoDB, Firebase, Redis, Cassandra, Strapi, Microsoft Azure

Tools: Git/GitHub, Docker, Postman, VS Code, Jupyter Notebook, Power BI, ArcGIS/QGIS, Excel

Analytical & Program Skills: Regulatory reporting, Stakeholder engagement, Strategic planning, Program evaluation, Technical writing, KPI and performance tracking, Cross-functional coordination, Public-sector project management

FEATURED INITIATIVES & TECHNICAL PROJECTS

Agricultural Water Quality (AWQ) Prioritization & Regulated Inventory Expansion | County of San Diego

Watershed Protection & Regulatory Compliance

- Designed and managed the Threat to Water Quality (TTWQ) site assessment and prioritization framework to support expansion of the AWQ regulated inventory
- Integrated watershed condition priorities, Water Quality Improvement Plan information across nine watersheds, field inspection data, and operational considerations into a structured prioritization approach
- Supported strategic identification and onboarding of higher-priority agricultural operations into routine compliance oversight workflows
- Coordinated across departments, technical staff, and regulatory stakeholders to improve consistency, defensibility, and transparency in prioritization decisions
- Contributed to regulatory communication, long-term watershed protection planning, and annual regulatory reporting to the San Diego Regional Water Quality Control Board
- Expanded the AWQ regulated inventory approximately fourfold, from roughly 300 to more than 1,600 sites, while reprioritizing sites based on relative TTWQ risk and balancing workloads across an expanded field team from two to six inspectors
- Supported programmatic oversight and budget planning associated with expanded regulatory coverage, staffing increases, and long-term compliance requirements

Water Ways Report | Regional water resilience initiative supporting environmental planning and stakeholder engagement

- Managed coordination of technical consultants, stakeholder engagement activities, and cross-departmental project workflows supporting regional water resilience planning

- Synthesized technical analyses, stakeholder perspectives, and public input into structured reporting and planning recommendations
- Supported development of deliverables related to water conservation, recycling, storage, stormwater capture, and resilience strategies
- Developed engagement and communication materials supporting transparency and stakeholder participation
- Led final report development, technical review coordination, stakeholder feedback integration, and finalization of the Water Ways Report provided to the San Diego County Board of Supervisors in April 2025
- Contributed to executive-level reporting and public-facing sustainability initiatives

Food Justice Community Action Plan | Countywide food systems initiative focused on equitable access and community-informed planning

- Coordinated stakeholder engagement, led 7 community meetings, and facilitated interdepartmental collaboration for development of a countywide food justice action plan presented to the County Board of Supervisors on December 11, 2024
- Analyzed qualitative and community-derived data to identify recurring themes, priorities, and implementation opportunities, including synthesis of more than 1,500 public comments into over 200 community ideas and 20 potential County actions
- Contributed to development of presentations, summaries, action plans, and public-facing deliverables supporting San Diego County Board of Supervisors' review and community engagement
- Supported development of strategic recommendations related to food access, public health, local agriculture, and sustainability
- Helped structure actionable implementation pathways while balancing stakeholder priorities and operational feasibility
- Supported communication of project vision, goals, and measurable outcomes across diverse audiences

Technical Data Projects | MIT xPRO Data Engineering & Independent Projects

- Built Python-based ETL workflows and data processing pipelines using structured and semi-structured datasets
- Designed SQL data models and relational database structures supporting data organization and analysis
- Developed REST API integrations and applied client-server architecture concepts
- Worked with MongoDB, Firebase, Redis, Cassandra, Docker, and Azure cloud services
- Developed GitHub portfolio featuring emerging data engineering work

CERTIFICATIONS

- Project Management Professional (PMP®) — Apr 2025
- Registered Environmental Manager (REM®) — Mar 2026
- IBM Python for Data Science, AI & Development — Jan 2026
- IBM Introduction to Data Engineering — Dec 2025
- Microsoft Azure Fundamentals (AZ-900) — May 2026
- MIT xPRO Professional Certificate in Data Engineering — Expected Aug 2026

PROFESSIONAL EXPERIENCE

County of San Diego — Group Program Manager

Office of Sustainability and Environmental Justice | Jul 2023 – Feb 2026

- Led data-driven sustainability initiatives involving multi-source datasets related to food access, water management, and climate resilience
- Managed reporting workflows integrating stakeholder and operational priorities

- Analyzed structured and unstructured data to support policy development and strategic planning
- Synthesized technical, operational, and community-derived information into executive-facing reports and strategic recommendations
- Served as reviewer for SANDAG Smart Growth Incentive Program Cycle 6 applications, evaluating project alignment, feasibility, and community benefit considerations

County of San Diego — Supervising Agricultural Standards Inspector

Department of Agriculture, Weights and Measures | Apr 2021 – Jul 2023

- Managed environmental compliance data for watershed and stormwater programs across regulated sites
- Developed data tracking and reporting systems supporting regulatory compliance, annual reporting, and program oversight
- Led data collection, validation, and analysis across field teams
- Designed prioritization framework for environmental risk assessment using watershed data

County of San Diego — Agricultural Standards Inspector (Senior/Staff)

Department of Agriculture, Weights and Measures | Mar 2016 – Apr 2021

- Conducted data collection, analysis, and reporting across agricultural regulatory programs
- Maintained records and documentation supporting inspections, enforcement, and regulatory reporting
- Analyzed operational and compliance data to identify issues and inform regulatory decision-making

United States Department of Agriculture (Contract) — Application Reviewer & Panel Chair

Agricultural Marketing Service | Jun 2022 – Aug 2024 | intermittent/contract

- Led structured review and scoring of competitive federal grant applications using standardized evaluation criteria and scoring frameworks
- Assessed technical merit, feasibility, alignment with program goals, and proposed implementation approaches
- Facilitated panel discussions and supported consensus-based evaluation processes as panel chair
- Synthesized qualitative and quantitative reviewer inputs into defensible written assessments and panel summaries
- Supported transparent, equitable, and consistent evaluation processes for community food systems and agricultural funding initiatives

ADDITIONAL EXPERIENCE

Compliance Aide, County of San Diego — Air Pollution Control District | 2015 – 2016

- Maintained regulatory datasets and supported tracking of compliance and enforcement activities

Park Attendant, County of San Diego — Parks and Recreation | 2014 – 2015

- Supported environmental data documentation and reporting for watershed protection programs

Temporary Office/Data Support, University of Virginia | 2013

- Performed confidential data entry, auditing, and record management for research datasets

Student Laboratory Assistant, California State University San Marcos | 2009 – 2011

- Conducted laboratory data collection and analysis; contributed to published environmental research

EDUCATION

M.S., Environmental Sciences & Policy — Johns Hopkins University (GPA 3.97)

B.S., Biology — California State University San Marcos (GPA 3.866)
